STATE ACTION ALERT

Urge Legislators to Maintain Funding for Crisis Pregnancy Centers

ISSUE: Since 2006, \$2 million in general revenue has been included in the state's fiscal budget to fund qualified crisis pregnancy centers throughout Florida. Funding is currently allocated in the House budget, but there is no appropriation in the Senate version. As the full Senate and House meet this week to debate their versions of the budget, some lawmakers are attempting to eliminate this important appropriation.

These centers provide essential information and counseling to women to promote childbirth and help them make responsible life choices. If funding is cut, vital services and information that is available for lower income women in difficult pregnancies would be severely limited.

ACTION: Please send a message to your Florida Senator and Representative urging them to maintain \$2 million in funding for crisis pregnancy centers that serve women and their children.
